

## COURSE INFORMATION

**Course Title:**

COMP506 Algorithm & Data Structure

**Semester:**

July Session, 2020

**CLASS HOURS:** Monday through Friday, 180 minutes each day, for three weeks. At the end of each week there will be a one-hour discussion session; the instructor will also be available by appointment.

**CREDITS(s): 3**

**Discussion Section:** 1 hour each week.

**Field Trip:** Not required.

## OVERVIEW

This course provides students with the opportunity to understand the essential data structures and algorithms. It covers fundamental data structures, algorithm analysis and design techniques required to address real-world programming challenges. It deepens students' understanding of the design and analysis of memory and time-efficient data structures and problem solving strategies used in various complex applications.

## LEARNING OUTCOME

Upon successful completion of this course, the students should have basic expertise in the following areas:

- Understand the internal workings of fundamental data structures and algorithms
- Determine the running time and memory space usage of common algorithms.
- Adapt or invent new algorithms and data structures for software engineering problems.
- Analyse the performance of algorithms built on fundamental data structures and algorithms.
- Select and justify appropriate combinations of data structures and algorithms to solve software engineering problems.

## LEARNING RESOURCES

**Suggested textbooks:** Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest and Clifford Stein, *Introduction to Algorithms, Third Edition*, MIT Press.

## WEEKLY SCHEDULE

Week	Day	Topic	Reading
1	1	Analysis of Algorithms * Programming basics * Big-O and other notations * Asymptotic analysis * Recursion	Chapters 2, 3
	2	Linked Lists, Stacks, Queues	Chapter 10

**Disclaimer:** Course schedule is subject to change and you will be responsible for abiding by any such changes.

		<ul style="list-style-type: none"> <li>* Singly linked list</li> <li>* Doubly linked list</li> <li>* Stacks</li> <li>* Queues</li> </ul>	
	3	Trees: <ul style="list-style-type: none"> <li>* Tree traversal</li> <li>* Binary search tree</li> <li>* Advanced trees (Splay tree, Red-black tree, B-tree)</li> </ul>	Chapters 12, 13
	4	Priority Queues <ul style="list-style-type: none"> <li>* Priority queues and heaps</li> <li>* Adaptive priority queues</li> </ul> <b>Quiz 1</b>	Chapter 19
	5	Sorting <ul style="list-style-type: none"> <li>* Bubble sort</li> <li>* Merge sort</li> <li>* Quick sort</li> </ul> <b>Assignment 1 is due</b>	Chapter 7
2	1	<b>Mid-semester Examination</b>	
	2	Sorting <ul style="list-style-type: none"> <li>* Bucket sort</li> <li>* Radix sort</li> <li>* Sorting lower bounds</li> </ul>	Chapter 8
	3	Set <ul style="list-style-type: none"> <li>* Set</li> <li>* Basic operations</li> <li>* Union-find</li> </ul>	Chapter 21
	4	Maps and Dictionaries <ul style="list-style-type: none"> <li>* Maps</li> <li>* Hash tables</li> <li>* Skip lists</li> </ul> <b>Quiz 2</b>	Chapter 11
	5	Pattern matching <ul style="list-style-type: none"> <li>* Rabin-Karp algorithm</li> <li>* Knuth-Morris-Pratt Algorithm</li> <li>* Boyer-Moore</li> </ul>	Chapter 32
3	1	Graph <ul style="list-style-type: none"> <li>* Adjacency matrix and adjacency list</li> <li>* Graph traversal</li> <li>* Connected component</li> <li>* Topological sort</li> </ul> <b>Assignment 2 is due</b>	Chapter 22
	2	Graph <ul style="list-style-type: none"> <li>* Minimum Spanning Tree</li> <li>* Dijkstra's algorithm</li> </ul>	Chapter 23
	3	Graph <ul style="list-style-type: none"> <li>* Dijkstra's algorithm</li> <li>* Bellman-Ford algorithm</li> </ul>	Chapter 24
	4	Revision	
	5	<b>Final Examination</b>	

**Disclaimer:** Course schedule is subject to change and you will be responsible for abiding by any such changes.

ASSESSMENT	
Assessment Task	Score Percentage
Attendance and Participation	10%
Quiz 1	5%
Quiz 2	5%
Assignment 1	10%
Assignment 2	10%
Mid-semester Examination	20%
Final Examination	40%
<b>Total</b>	<b>100%</b>

## DETAILS ON GRADE COMPONENTS

### 1. Attendance and Participation

Students are required to attend all classes and participate actively. Students should treat their classroom obligations as they would treat any serious professional engagement. Your participation grade will be based on the instructor's assessment of how well you contribute to classroom dynamics relative to your class peers.

**NB:** In case of an absence, the student is responsible for the materials and assignments for that class; it is the student's responsibility to inform the instructor regarding absences and assignments that are missed. **Unexcused absence from three or more scheduled class sessions will be grounds for failure in this course.** If you do have to miss class due to a personal emergency, please let the instructor know as soon as possible. Such emergencies will be dealt with on a case-by-case basis.

Participation grades will be based on **quality** (in-class performance that reflects intellectual depth, insightfulness, and contribution to class learning) and **quantity** (consistency and regularity of performance).

Accordingly, **you are expected to read the related chapters before participating the class.** Be prepared to be called upon to "open" a class discussion by presenting your full analysis and thoughts on the assigned topic at the start of class, or to be asked through a "cold call" for comment during the discussion.

The grading of class participation is necessarily a subjective exercise. However, high-quality comments have one or more of the following characteristics: **(1) insightfulness, (2) appropriate application of course concepts, and (3) advancement of the in-class discussion at hand.**

### 2. Quizzes

Quizzes will happen on the first and second weeks to review and reinforce what has been learned in the previous classes.

### 3. Assignments

To enhance the learning process, students have to submit two assignments. Each assignment weighs 10% of the total marks.

*Assignment 1* covers Divide-and-conquer, Dynamic programming and Greedy algorithm. It

**Disclaimer:** Course schedule is subject to change and you will be responsible for abiding by any such changes.

is due on Friday of the first week.

*Assignment 2* covers graph theories and graph algorithms. It is due on Monday of the third week.

#### 4. Mid-semester Examination

The mid-semester examination will be held on Monday of the second week. It will cover the contents of the first week including but not limited to Divide-and-conquer, Randomised algorithms, Dynamic programming and Greedy algorithms.

#### 5. Final Examination

An in-class final examination will be administered at the end of the course on Friday of the third week. Details of contents, exam format, etc. will be announced in class well before the examination dates.

#### 6. Course Grading

Upon completion of this course, you receive a final grade. A final grade is a letter grade that carries with it a numerical value, as outlined below.

Grade	Mark
A	80-100
B	70-79
C	60-69
D	50-59
E	0-49

**To pass this subject, students are required to obtain Grade B or above in order to satisfy all the intended learning outcomes.**

### CLASSROOM ETHICS & COURSE POLICIES

Being respectful of others' opinions, values and culture

Cell phones are only permitted when the usage is related to the course. Absolutely **NO TEXTING** during class will be tolerated. If you have an emergency situation and you must be able to be reached, set the phone to vibrate and leave the room immediately when it goes off.

Any student with a documented disability needing academic adjustments or accommodations should notify the instructor or the program administrator before the start of the program, so such an arrangement will be made accordingly.

Any student who anticipates a schedule conflict because of religious reasons should make arrangements within two weeks of the start of class.

#### *Academic misconduct*

Please follow the guideline of the university policy. Academic dishonesty or misconduct will not be tolerated and may result in disciplinary action including a grade F for the course. Work submitted must be the original work of the student. Original work may include the words and ideas of others, but the source of these words and ideas must be
